

Glider Workshop

28th February 2015
10.00am – 5.00pm

The Centre,
Beaudesert

Do you know that of six species of gliding possum in Australia, five of them live in the Scenic Rim? We know quite a lot about them, but need a lot more local information for effective conservation management plans. You can help us gather that information by joining surveys, reporting sightings or inviting us to survey your property.

Morning: Review of glider surveys conducted so far by Scenic Rim Wildlife volunteers. Presentation by glider expert Dr Ross Goldingay on ecology and behaviour, and his research on the use of 'glider poles' to connect habitat fragments

Afternoon: Future plans for surveys. Launch of children's book (featuring sugar gliders) by Robin Adolphs. Live gliders and other nocturnal animals with Gecko's Wildlife.

RSVP to reserve your seat Free Entry!
